

# A/B Testing (Mock)

## Objective

To determine which advertising message generated stronger audience engagement and encouraged more inquiries.

## Test Details

| Element  | Version A                                 | Version B                               |
|----------|-------------------------------------------|-----------------------------------------|
| Headline | Handmade Crochet Gifts for Every Occasion | Looking for a Meaningful Handmade Gift? |
| CTA      | Shop Now                                  | Learn More                              |
| Focus    | Product Variety                           | Emotional Value                         |

## Expected Outcome

Version B is expected to achieve a higher engagement rate because emotional messaging often performs better for handmade products by creating a stronger connection with potential customers.

## Recommendation

Future campaigns should continue incorporating storytelling and emotional value into advertising copy while maintaining clear calls to action.
