Crochet Tip of the Month

Master Your Tension body!

If your edges are curling or your stitches feel too tight, try changing how you hold your working yarn.

- Weaving the yarn over your index finger, under your middle finger, and around your pinky naturally creates gentle, consistent friction.

This keeps your stitches perfectly uniform without straining your hands!

Thank You for Supporting Handmade

Every order supports creativity, craftsmanship, and a small handmade business. Your support allows us to continue creating meaningful crochet products that bring joy to others.

Thank you for being part of the Yarn Charms community.

Happy Crocheting!
