

Optimization Notes

Content Optimization

- Educational posts are prioritized due to higher engagement in Project 1.
- Reels are optimized for process-based storytelling rather than only product showcase.
- Captions are simplified and made more conversational to increase relatability.

Engagement Optimization

- Interactive stories (polls, questions) are introduced to increase story engagement rate.
- Comment-driven posts are used to boost algorithm visibility.
- Platform Optimization
- Instagram remains the primary platform for visual content.
- Facebook is used for broader reach and community engagement.
- LinkedIn is used for storytelling and business positioning.
- Reddit is used for community-based discussions and reach expansion.
- Content Efficiency Optimization
- Existing content (reels and product posts) is reused and repurposed instead of creating entirely new assets.
- Focus is placed on improving performance of existing content rather than increasing quantity.
