

Updated Marketing Strategy

Overview

Following the completion of Project 1, Yarn Charms has already established a digital presence on Instagram and Facebook with consistent engagement. Project 2 focuses on optimizing this existing performance by refining content strategy, increasing engagement quality, and introducing advanced marketing techniques.

Key Strategic Shift

The strategy has shifted from:

“Content creation and brand awareness”

to:

“Performance optimization and audience engagement growth”

Core Strategy Pillars

1. Educational Content First Approach

Based on previous performance insights, educational posts generated higher engagement compared to purely promotional content. Therefore, educational content is prioritized in Project 2.

2. Engagement-Driven Growth

Interactive content such as polls, questions, and community prompts is used to increase comments, saves, and shares.

3. Soft Product Marketing

Instead of aggressive selling, products are introduced through storytelling, process content, and lifestyle integration.

4. Multi-Platform Repurposing

Content is adapted for Instagram, Facebook, LinkedIn, and Reddit to maximize reach without creating entirely new material.

5. Data-Informed Optimization

Content decisions are guided by engagement metrics such as reach, saves, shares, and watch time.
