

Content Marketing Strategy

Overview

The content marketing strategy for Project 2 was developed using insights gathered during Project 1. Performance analysis indicated that educational content generated the highest audience engagement, while process-based videos and product launches received strong reach and interaction. Based on these findings, the content strategy was refined to prioritize educational value while maintaining a balanced mix of promotional and engagement-focused content.

Strategy Objectives

- Increase audience engagement through educational content.
- Build trust by sharing crochet knowledge and behind-the-scenes content.
- Promote products naturally without excessive sales-focused messaging.
- Encourage audience participation through interactive stories and polls.
- Repurpose content across multiple platforms to maximize visibility.

Content Mix

Content Category	Purpose
Educational	Educate the audience, increase saves and shares
Product Promotion	Showcase handmade products and encourage inquiries
Reels	Improve reach through short-form video
Stories	Build community through interactive engagement
Professional Content	Strengthen brand credibility on LinkedIn
Repurposed Content	Extend reach using existing content

Platforms Used
