1. Executive Summary

Project 2 focused on **optimizing and scaling** the digital marketing campaign developed during Project 1 for Yarn Charms, a handmade crochet business. Rather than launching a completely new campaign, the project built upon previous campaign insights and implemented more strategic, data-driven marketing decisions.

The primary objective was to **improve audience engagement, expand brand visibility, and explore advanced digital marketing techniques** while maintaining a consistent brand identity. The campaign incorporated educational content, product promotions, engagement-focused reels, influencer outreach planning, search engine marketing (SEM), mock paid advertising, email marketing, LinkedIn content, and analytics-driven optimization.

A total of eight social media content pieces were published across Instagram and Facebook, including educational carousel posts, product launches, and short-form video content. In addition, professional content was repurposed for LinkedIn through both a professional post and a long-form article to expand audience reach beyond traditional social media platforms.

Performance monitoring played a central role throughout the campaign. Analytics collected from Instagram, Facebook, and LinkedIn demonstrated clear differences in audience behavior across platforms. Instagram generated stronger engagement and content interactions, particularly through reels, while Facebook showed greater effectiveness in attracting new followers and generating customer inquiries.

The campaign also introduced mock Google Ads, Search Engine Marketing (SEM), influencer outreach planning, retargeting advertisements, and a three-email drip campaign to simulate a comprehensive digital marketing strategy. Although these activities were not executed with a live advertising budget, they demonstrated practical understanding of paid marketing principles and campaign planning.

Overall, Project 2 **successfully achieved its objective** of transforming insights gathered during Project 1 into measurable improvements. The campaign highlighted the importance of educational content, product demonstration videos, and platform-specific optimization in creating a more effective digital marketing strategy.

2. Campaign Overview

2.1 Project Background

Following the successful completion of Project 1, the second phase of the digital marketing internship focused on optimizing and scaling the existing marketing campaign for Yarn Charms, a handmade crochet business specializing in crochet flowers, accessories, bags, keychains, and custom handmade products.

Unlike Project 1, which primarily focused on establishing an online presence and increasing brand awareness, Project 2 emphasized improving campaign performance through **data-driven decision-making**. Insights gathered during the first campaign were used to refine the content strategy, strengthen audience engagement, and introduce advanced digital marketing techniques such as Search Engine Marketing (SEM), influencer outreach, retargeting advertisements, content repurposing, and email marketing.

The campaign continued to use Instagram and Facebook as the primary marketing platforms while expanding its professional presence through LinkedIn. Throughout the project, marketing decisions were guided by platform analytics, allowing content to be **optimized according to audience behavior and engagement patterns**.

By combining organic content with mock paid marketing strategies, Project 2 aimed to simulate a comprehensive digital marketing campaign while demonstrating practical marketing skills applicable to real business environments.

2.2 Campaign Objectives

The primary objective of Project 2 was to optimize the existing digital marketing campaign by applying advanced marketing strategies and evaluating their effectiveness through analytics.

The campaign objectives included:

- Optimize the content strategy using performance insights from Project 1.
- Increase audience engagement through educational and interactive content.
- Strengthen brand awareness across multiple digital platforms.
- Promote handmade crochet products using engaging and value-driven content.
- Introduce Search Engine Marketing (SEM) and mock Google Ads campaigns.
- Develop a retargeting strategy for previously engaged audiences.
- Plan influencer collaborations suitable for a handmade business.
- Create a three-email drip campaign to encourage customer engagement and retention.
- Repurpose content for LinkedIn and Reddit to extend audience reach.
- Measure campaign performance using analytics and key performance indicators.
- Recommend improvements for future digital marketing campaigns.

2.3 Campaign Scope

The campaign consisted of both practical implementation and strategic planning activities.

Organic Marketing

- Educational carousel posts
- Product launch posts
- Product demonstration reels
- Professional LinkedIn content
- Content repurposing
- Community engagement planning

Paid Marketing (Mock)

- Google Search Ads
- Search Engine Marketing (SEM)
- Meta engagement campaign
- Retargeting advertisement
- Audience targeting strategy
- Customer Relationship Marketing
- Three-email drip campaign
- Influencer outreach strategy
- Community-building activities

Performance Evaluation

- Instagram Insights
- Facebook Insights
- LinkedIn Analytics
- Content performance analysis
- Audience growth analysis
- Campaign optimization recommendations

3. Marketing Strategy & Campaign Optimization

3.1 Strategy Development

Project 2 adopted a data-driven marketing approach by analyzing the results of Project 1 before developing new content. Rather than increasing the volume of promotional posts, the strategy focused on **producing content that aligned with audience preferences and generated higher engagement.**

Performance analysis from Project 1 indicated that educational content and product demonstration reels consistently outperformed traditional promotional posts. These findings became the foundation of the new content strategy.

The updated campaign emphasized three key principles:

- Educate before promoting.
- Demonstrate product value through practical usage.
- Encourage meaningful audience interaction.

This strategic shift allowed Yarn Charms to strengthen its relationship with existing followers while attracting new audiences through informative and engaging content.

3.2 Content Strategy

The content plan was carefully balanced to meet different marketing objectives while maintaining consistency across platforms.

Educational Content

Educational posts were designed to answer common crochet-related questions, provide useful information, and establish Yarn Charms as a trustworthy source of crochet knowledge.

Published educational posts included:

- Let's Answer Crochet FAQs – Part 2
- Crochet Myths vs Facts
- Difference Between US & UK Crochet Terms

Product Promotion

Instead of focusing solely on product images, promotional content highlighted practical product usage and encouraged potential customers to visualize how the products fit into their daily lives.

Published product posts included:

- Crochet Phone Handbag
- Crochet Earphone Bag Launch
- Engagement Content
- Short-form videos focused on demonstrating how products are used rather than simply displaying them.

Published reels included:

- Crochet Phone Handbag Reel
- Behind the Scenes of Crochet Earphone Bag
- Crochet Earphone Bag Demonstration Reel

Professional Content

Professional content was repurposed for LinkedIn to showcase practical marketing experience gained throughout the internship.

Published LinkedIn content included:

- Marketing Insights from Running Yarn Charms (Post)
- What Managing Yarn Charms Taught Me About Digital Marketing (Article)

3.3 Campaign Optimization Approach

The optimization process was based on continuous observation of audience behavior throughout the campaign.

Key optimization decisions included:

- Increasing educational content after identifying stronger engagement during Project 1.

- Creating product demonstration reels instead of static product showcases.
- Writing captions that encouraged discussion and audience participation.
- Maintaining consistent branding across Instagram, Facebook, and LinkedIn.
- Repurposing existing content to maximize reach while reducing production time.
- Monitoring analytics regularly to evaluate campaign performance and identify improvement opportunities.

This approach ensured that each content decision was supported by previous campaign insights rather than assumptions, resulting in a more focused and effective marketing strategy.

4. Content Performance Analysis

4.1 Overview

A total of eight content pieces were published across Instagram and Facebook during Project 2, including educational carousel posts, product promotions, and engagement-focused reels. The campaign was designed to build upon the findings of Project 1, where educational content and product demonstration videos showed strong engagement.

In addition to Instagram and Facebook, professional content was also published on LinkedIn through a professional post and a long-form article, expanding the campaign's reach to a professional audience.

Content Published

Content Type	Number Published
Educational Posts	3
Product Promotion Posts	2
Reels	3
LinkedIn Professional Post	1
LinkedIn Article	1
Planned Community Stories	3 (Mock)

4.2 Individual Content Performance

1. Crochet Phone Handbag (Product Promotion)

Published: 21 June 2026

KPIs	Instagram Performance	Facebook Performance
Reach	66	34
Likes	14	2
Shares	1	16
Views	182	85
Interactions	17	18
Profile Visits	4	-

Performance Analysis

This product launch successfully introduced the Crochet Phone Handbag while generating a balanced level of engagement across both platforms.

Although **Instagram achieved higher reach and likes**, Facebook users shared the post more frequently, indicating that the product appealed to audiences looking for unique handmade gift ideas.

The post also generated profile visits, demonstrating its ability to encourage users to explore the Yarn Charms page.

2. Crochet Phone Handbag Reel

Published: 23 June 2026

KPIs	Instagram Performance	Facebook Performance
Reach	1,156	600
Likes	24	5
Shares	1	12
Views	1,345	19
Interactions	28	19
Profile Visits	3	-
Followers Gained	1	-
Saves	3	-
Comments	-	2

Performance Analysis

The Crochet Phone Handbag Reel was the **highest-performing content** piece in terms of reach and video views. Demonstrating how the handbag could be used in everyday situations made the content more engaging and relatable than a traditional product showcase.

This **supports the observation that audiences are more likely to engage with content demonstrating product functionality** rather than static promotional images. The reel also contributed to follower growth on Instagram, highlighting its effectiveness in expanding brand visibility.

3. Behind the Scenes – Crochet Earphone Bag

Published: 28 June 2026

KPIs	Instagram Performance	Facebook Performance
Reach	44	51
Likes	12	3
Shares	-	12
Views	209	95
Interactions	14	15
Profile Visits	1	-

Performance Analysis

The behind-the-scenes reel provided followers with a glimpse into the handmade production process. While its reach was lower than other reels, it contributed to brand authenticity by showcasing the effort involved in creating crochet products.

Behind-the-scenes content **helps build trust and strengthens the emotional connection** between the audience and the brand.

4. Let's Answer Crochet FAQs – Part 2

Published: 3 July 2026

KPIs	Instagram Performance	Facebook Performance
Reach	37	24
Likes	11	2
Shares	1	14
Views	162	54
Interactions	27	13
Profile Visits	3	-

Performance Analysis

This educational carousel continued the FAQ series introduced during Project 1. Although its reach was modest, it **generated meaningful engagement, reinforcing the effectiveness of educational content** in encouraging audience interaction.

Educational posts continue to position Yarn Charms as a knowledgeable and trustworthy handmade brand.

5. Crochet Earphone Bag Launch

Published: 5 July 2026

KPIs	Instagram Performance	Facebook Performance
Reach	48	19
Likes	18	4
Shares	2	12
Views	193	40
Interactions	33	14
Profile Visits	-	-
Lead Generated	-	1

Performance Analysis

The official launch of the Crochet Earphone Bag generated strong audience interest, particularly on Facebook. One **potential customer from New York directly contacted the business to inquire about the product and shared their location**. Although the purchase could not proceed due to international shipping costs, the interaction demonstrated genuine purchase intent and highlighted the campaign's ability to reach audiences beyond Pakistan.

6. Crochet Myths vs Facts

Published: 6 July 2026

KPIs	Instagram Performance	Facebook Performance
Reach	20	18
Likes	8	1
Shares	-	12
Views	100	23
Interactions	9	12
Profile Visits	2	-

Performance Analysis

This educational post aimed to correct common misconceptions about crochet. While overall reach remained relatively low, the content contributed to audience education and supported the campaign's strategy of providing valuable information alongside promotional content.

7. Crochet Earphone Bag Demonstration Reel

Published: 7 July 2026

KPIs	Instagram Performance	Facebook Performance
Reach	430	263
Likes	19	5
Shares	-	11
Views	806	325
Interactions	35	18
Profile Visits	1	-
Comments	2	1
Lead Generated	1	-
Followers Gained	1	-

Performance Analysis

This reel demonstrated how the crochet earphone bag could be used in everyday life. Compared to static promotional posts, the practical demonstration significantly increased audience interest and generated an Instagram lead through user interaction in the comments. The content also attracted an additional follower and achieved **one of the highest interaction counts among all campaign posts**.

The performance further confirmed that product demonstration videos are more effective than traditional product displays.

8. Difference Between US & UK Crochet Terms

Published: 8 July 2026

KPIs	Instagram Performance	Facebook Performance
Reach	28	47
Likes	10	1
Shares	-	12

Views	76	76
Interactions	11	13
Profile Visits	-	-

Performance Analysis

This educational post targeted crochet enthusiasts by explaining the difference between US and UK crochet terminology. The content supported the campaign's educational strategy and broadened the variety of informational posts shared during Project 2.

Although it generated moderate engagement, it added value by addressing a common topic relevant to beginners and experienced crocheters alike.

4.3 Overall Content Insights

Analysis of the campaign reveals several clear trends:

- Reels consistently achieved the highest reach and video views, particularly when they demonstrated how products could be used in everyday situations.
- Educational content generated meaningful engagement, reinforcing the value of providing useful information rather than focusing solely on promotion.
- Facebook proved more effective for generating inquiries and follower growth, while Instagram excelled at engagement and content interactions.
- Product demonstration videos outperformed static promotional posts, indicating that audiences responded more positively to content showing the practical use of handmade products.
- Educational content continued to strengthen Yarn Charms' brand identity by positioning it as both a handmade business and a source of crochet knowledge.

These findings directly influenced the optimization recommendations presented later in this report and provide a strong foundation for future digital marketing campaigns.

5. Platform-wise Performance Analysis

5.1 Overview

To maximize campaign reach and engagement, Project 2 utilized three digital platforms: Instagram, Facebook, and LinkedIn. Each platform served a distinct purpose within the overall marketing strategy.

Instagram was primarily used to build engagement through visually appealing content and short-form videos. Facebook focused on expanding audience reach, increasing community growth, and generating customer inquiries. LinkedIn was used to establish a professional presence by sharing marketing insights and documenting practical internship experience.

The performance across these platforms demonstrates the importance of adapting content strategies to different audience behaviors rather than expecting identical results from every platform.

5.2 Instagram Performance Analysis

Instagram remained the primary platform for visual storytelling and audience engagement. Throughout the campaign, reels consistently outperformed static posts in terms of reach, views, and interactions.

Educational carousel posts also performed well by encouraging users to engage with informative content rather than promotional material alone.

The combination of educational posts, product demonstrations, and consistent branding helped maintain audience interest throughout the campaign.

Instagram Highlights

- Reels generated the highest reach and video views.
- Product demonstration videos received stronger engagement than static product images.
- Educational posts encouraged meaningful audience interaction.
- One qualified lead was generated through audience engagement on the Crochet Earphone Bag Reel.
- Profile visits indicated continued interest in the brand following content publication.

Instagram Growth

Metric	Project 1	Project 2	Change
Followers	85	85	No change
Total Views	6.1K	6.2K	+100 views

Although follower growth remained unchanged during the reporting period, the platform continued to deliver valuable engagement and visibility. This suggests that **Instagram served primarily as an engagement platform rather than the strongest channel for audience acquisition.**

5.3 Facebook Performance Analysis

Facebook emerged as the strongest platform for community growth and customer inquiries during Project 2.

Although average reach per post was generally lower than Instagram, Facebook demonstrated significantly stronger follower growth and **generated direct conversations with potential customers.**

The platform proved particularly effective for product-focused content, with **two customer inquiries resulting from the Crochet Earphone Bag campaign.** One customer from New York expressed genuine purchase interest by sharing their location and requesting pricing information. While the sale could not be completed due to international shipping costs, the interaction demonstrated the campaign's ability to reach audiences beyond the local market.

Facebook Highlights

- Significant increase in page followers.
- Two customer inquiries generated.
- Strong content sharing behavior across product posts.
- Effective platform for expanding community reach.
- Higher conversion potential compared to Instagram.

Facebook Growth

Metric	Project 1	Project 2	Change
Followers	262	770	+508 followers
Total Views	9,470	9,797	+327 page views

The substantial increase in followers demonstrates Facebook's effectiveness in **reaching new audiences and supporting long-term community growth.**

5.4 LinkedIn Performance Analysis

LinkedIn was introduced as part of the campaign expansion strategy to showcase practical digital marketing experience while repurposing existing campaign content for a professional audience.

Instead of promoting products directly, LinkedIn content **focused on sharing marketing insights** gained from managing Yarn Charms. This approach aligned with the expectations of LinkedIn users while demonstrating professional growth throughout the internship.

Two pieces of content were published:

- Professional LinkedIn Post: Marketing Insights from Running Yarn Charms
- LinkedIn Article: What Managing Yarn Charms Taught Me About Digital Marketing

KPIs	LinkedIn Post Performance	LinkedIn Article Performance
Impressions	877	222
Members Reached	645	150
Profile Views	2	2
Followers Gained	2	-
Social Engagements	5	4

Performance Analysis

The professional **post achieved significantly higher visibility** than the long-form article, indicating that **concise, experience-based content attracted greater attention from LinkedIn users.** The article, while reaching a smaller audience, still generated meaningful engagement by providing detailed reflections on practical digital marketing experience. Publishing both formats demonstrated the ability to repurpose campaign content for different audiences while strengthening professional branding.

5.5 Cross-Platform Comparison

The campaign clearly demonstrated that each platform contributed differently to the overall marketing objectives.

Platform	Primary Strength	Key Result
Instagram	Engagement & Visual Content	Highest reel reach and interactions
Facebook	Community Growth & Customer Inquiries	+508 followers and 2 customer Inquiries
LinkedIn	Professional Branding	1,099 total impressions across post and article

Rather than relying on a single platform, Project 2 benefited from a **multi-platform strategy that leveraged the strengths of each channel**. Instagram encouraged audience interaction, Facebook supported community growth and conversions, and LinkedIn expanded the campaign into a professional networking environment.

5.6 Key Insight

One of the most valuable findings from Project 2 was that **audience behavior varied significantly across platforms**.

Instagram users were more likely to engage with visually appealing reels and educational content, whereas Facebook users were more inclined to follow the page, share content, and initiate direct conversations about products. LinkedIn audiences responded positively to professional reflections and practical marketing experiences.

These insights highlight the **importance of tailoring content to each platform rather than using the same strategy across all channels**. A platform-specific approach can improve engagement, increase conversions, and strengthen overall campaign performance.

6. Search Engine Marketing (SEM) & Paid Marketing Analysis

6.1 Search Engine Marketing (SEM)

As part of Project 2, a Search Engine Marketing (SEM) strategy was developed to **improve the online discoverability of Yarn Charms**.

Although *no live advertising budget was used*, the activity demonstrated the **planning and research involved in creating an effective search marketing campaign**.

Keyword research was conducted using Ubersuggest and Keyword Tool to identify search terms that potential customers are likely to use when looking for handmade crochet products. The selected keywords reflected both purchase intent and informational searches, ensuring that the campaign could target customers at different stages of their buying journey.

The keyword strategy combined product-specific phrases such as "Crochet Phone Bags" and "Handmade Crochet Gifts" with broader search terms including "Handmade Gift Ideas" and "Crochet Tutorials." This balanced approach was designed to attract users actively searching for crochet products while also increasing visibility among individuals seeking inspiration, gift ideas, or crochet-related information.

The research also **highlighted the importance of educational search queries, supporting the campaign's decision to publish informative content alongside promotional posts**. This alignment between content marketing and SEM strengthens overall digital visibility and contributes to long-term organic growth.

6.2 Mock Google Ads Campaign

To complement the organic marketing strategy, two mock Google Search advertisements were developed as part of the SEM campaign. These advertisements were designed to **increase visibility among users searching for handmade crochet gifts and encourage visits to Yarn Charms' social media platforms**.

The campaign targeted users in Pakistan aged 18–40 years who showed an interest in handmade crafts, personalized gifts, crochet accessories, and small businesses.

Two ad variations were prepared to evaluate different messaging approaches:

- Ad Variation A: Focused on showcasing the variety of handmade crochet products available.

- Ad Variation B: Used emotional messaging by emphasizing meaningful, handmade gifts and customization options.

A mock daily budget of PKR 500 with a Maximize Clicks bidding strategy was proposed for a seven-day campaign.

As these advertisements were created for demonstration purposes only, no live campaign was launched and therefore no measurable advertising metrics such as Click-Through Rate (CTR), Cost Per Click (CPC), or conversions were collected.

6.3 Meta Advertising Strategy

In addition to Google Ads, a mock Meta advertising campaign was designed to support the organic content strategy implemented on Instagram and Facebook.

The primary objective of the campaign was to increase customer conversations by promoting products to audiences most likely to engage with handmade crochet accessories. Audience targeting included users interested in crochet, handmade gifts, DIY crafts, fashion accessories, and small businesses.

The proposed campaign included placements across Instagram Feed, Facebook Feed, Instagram Stories, and Facebook Stories, ensuring consistent visibility across Meta platforms.

This mock campaign **demonstrated an understanding of audience segmentation, campaign objectives, budget allocation, and creative planning without requiring financial investment.**

6.4 Retargeting Campaign

A mock retargeting campaign was also developed to re-engage users who had previously interacted with Yarn Charms' content but had not completed a purchase or initiated a conversation.

The campaign targeted users who had:

- Engaged with Instagram or Facebook posts within the previous 30 days.
- Viewed product reels.
- Visited the Yarn Charms profile.
- Sent inquiries without placing an order.

The **campaign objective was Conversations**, encouraging interested users to return and message the business regarding custom orders or product availability.

Although the campaign was not executed, its design reflects an understanding of customer journey marketing and demonstrates how retargeting can improve conversion opportunities by focusing on audiences already familiar with the brand.

6.5 Overall Evaluation

The inclusion of SEM and mock paid advertising expanded the campaign beyond organic social media marketing and **provided practical experience in planning integrated digital marketing strategies**.

While these campaigns were not launched with a live advertising budget, they demonstrated the ability to conduct keyword research, identify target audiences, create compelling ad copy, and design campaigns aligned with specific marketing objectives.

By integrating SEM planning with content marketing, influencer outreach, and analytics, Project 2 adopted a more comprehensive and strategic approach to digital marketing than Project 1. This reflects the progression from foundational social media management to a broader understanding of multi-channel campaign planning and optimization.

7. Influencer Outreach & Email Marketing

7.1 Influencer Outreach Strategy

As part of the campaign expansion strategy, an influencer outreach plan was developed to increase Yarn Charms' visibility through authentic collaborations with content creators. Instead of targeting celebrities or large-scale influencers, the strategy focused on micro-influencers, whose audiences are generally more engaged and have stronger trust in product recommendations.

Five potential influencers within the handmade crafts, crochet, DIY, lifestyle, and gift niches were identified based on audience relevance, engagement, and alignment with the Yarn Charms brand. Personalized

outreach message drafts were also prepared to establish professional communication and propose collaboration opportunities.

The proposed collaborations included:

- Honest product reviews.
- Instagram Reels featuring crochet products.
- Story mentions and product showcases.
- Unboxing videos.
- Gift recommendation posts.

This approach was selected **because micro-influencers often generate higher engagement rates and foster authentic interactions**, making them a suitable marketing channel for a handmade business.

7.2 Expected Benefits of Influencer Marketing

Although influencer collaborations were not executed during the project period, this strategy was expected to contribute to several long-term marketing objectives:

- Increase brand awareness among niche audiences.
- Improve trust through authentic creator recommendations.
- Generate user-generated content.
- Reach new potential customers interested in handmade products.
- Increase profile visits and customer inquiries.
- For a small business like Yarn Charms, influencer marketing offers an affordable and effective method of expanding brand reach while maintaining authenticity.

7.3 Email Marketing Campaign

To complement the social media strategy, a mock three-email drip campaign was developed to **strengthen customer relationships and encourage long-term engagement**.

Rather than focusing solely on sales, the campaign was designed to deliver value throughout the customer journey by educating subscribers, showcasing products, and encouraging continued interaction with the brand.

The campaign consisted of three emails:

Email	Objective
Email 1	Build trust by sharing the story and value behind

	handmade crochet products.
Email 2	Introduce Yarn Charms' handmade collection and encourage custom order inquiries.
Email 3	Improve customer retention by offering free crochet patterns and exclusive updates to subscribers.

This sequence follows a relationship-focused approach by gradually moving subscribers from brand awareness to **engagement and long-term loyalty**.

7.4 Email Marketing Strategy

The email campaign was designed around the principle of value-driven marketing. Instead of relying on frequent promotional messages, each email **aimed to provide useful and meaningful content to subscribers**.

Particular emphasis was placed on the third email, which offered free crochet patterns as an incentive for users to remain subscribed. This strategy encourages continued engagement while positioning Yarn Charms as both a handmade business and a valuable resource for crochet enthusiasts.

If implemented as a live campaign, key performance indicators would include:

- Email open rate.
- Click-through rate (CTR).
- Reply rate.
- Subscriber retention rate.
- Conversion to product inquiries.

Although the campaign was not launched, it demonstrated practical knowledge of email automation, customer segmentation, and lifecycle marketing.

7.5 Community Building

Building a loyal community is an essential component of sustainable digital marketing. As part of Project 2, interactive story concepts were developed to encourage audience participation and strengthen relationships with followers.

The proposed community-building activities included:

- Poll: Which crochet item should I make next?
- This or That: Tulip or Rose?
- Question Sticker: Ask Me Anything About Crochet.

These activities were designed to increase engagement, gather audience preferences, and create opportunities for two-way communication. **Due to the shortened project timeline, these story designs were prepared but not published during the reporting period.**

Despite this limitation, the planned activities demonstrate an understanding of community-focused marketing and how interactive content can contribute to stronger audience relationships over time.

7.6 Summary

Project 2 expanded beyond organic content creation by incorporating additional digital marketing channels such as influencer outreach planning, email marketing, and community-building strategies. Although these activities remained at the planning stage, they formed an important part of the overall campaign by **demonstrating the ability to design integrated marketing initiatives that support long-term brand growth.**

The inclusion of these strategies reflects a broader understanding of digital marketing, extending beyond content creation to encompass customer relationship management, audience engagement, and multi-channel campaign planning.

8. **Analytics & Key Performance Indicators (KPIs)**

8.1 Overview

Analytics played a central role throughout Project 2 by providing measurable insights into campaign performance across Instagram, Facebook, and LinkedIn. Rather than relying on assumptions, performance was monitored after each published post, allowing content effectiveness to be evaluated using real engagement metrics.

The analysis focused on key performance indicators (KPIs) including reach, impressions, engagement, profile activity, audience growth, and lead generation. These insights were then used to identify high-performing content and evaluate how different platforms contributed to the overall campaign objectives.

8.2 Key Performance Indicators

The campaign was evaluated using the following performance metrics:

- Reach
- Impressions
- Views
- Likes
- Comments
- Shares
- Saves
- Profile Visits
- Followers Gained
- Audience Growth
- Customer Inquiries (Leads)
- LinkedIn Professional Metrics

Together, these KPIs provided a comprehensive picture of campaign effectiveness and audience behaviour.

8.3 Audience Growth Analysis

One of the most noticeable outcomes of Project 2 was the difference in audience growth across platforms.

Platform	Project 1	Project 2	Growth
Instagram Followers	85	85	0
Facebook Followers	262	770	+508
IG Views	6.1K	6.2K	+100
FB Page Views	9,470	9,797	+327

Analysis

Although Instagram follower numbers remained stable during the campaign period, the platform continued to generate strong engagement through reels and educational posts. This indicates that **Instagram users actively interacted with content without necessarily converting into new followers within the limited project timeline.**

Facebook, on the other hand, experienced remarkable community growth with an increase of 508 followers. This demonstrates the platform's effectiveness in **expanding brand awareness and attracting new audiences.** The increase in page views further suggests that users were exploring the business after interacting with campaign content.

These findings highlight that audience growth should not be evaluated solely through follower counts, but also through visibility, engagement, and user actions.

8.4 Lead Generation & Customer Interest

Beyond engagement metrics, one of the campaign's primary objectives was to encourage genuine customer interest.

Facebook

The campaign generated two direct customer inquiries through Facebook.

The first inquiry resulted from the Crochet Earphone Bag Launch post, where a customer from New York expressed strong purchase intent by requesting pricing information and sharing their location. Although the purchase could not be completed due to high international shipping costs, the interaction **demonstrated that the campaign successfully reached audiences beyond Pakistan.**

The second inquiry came from the Crochet Earphone Bag Demonstration Reel, where another user appreciated the product and requested additional information.

Instagram

Instagram generated one qualified lead through the Crochet Earphone Bag Demonstration Reel. The user expressed interest by commenting on the post, indicating potential purchase intent and increasing the opportunity for future customer engagement.

Analysis

These inquiries demonstrate that the campaign achieved more than simple engagement - it successfully **encouraged potential customers to initiate conversations about Yarn Charms' products.** This suggests that content showcasing real product usage was more effective in generating buying interest than static promotional posts.

8.5 LinkedIn Analytics

Project 2 expanded content distribution to LinkedIn through both a professional post and a long-form article.

KPIs	LinkedIn Post Performance	LinkedIn Article Performance
Impressions	877	222
Members Reached	645	150
Profile Views	2	2
Followers Gained	2	-
Social Engagements	5	4

Analysis

The professional post significantly outperformed the article in terms of impressions and audience reach. Short-form professional reflections appeared to resonate more strongly with LinkedIn users, while the article provided an opportunity to share detailed marketing insights with a smaller but engaged audience.

Together, both pieces strengthened professional visibility and **demonstrated the successful repurposing of campaign content for a business-oriented platform.**

8.6 Best-Performing Content

Performance analysis identified clear patterns across the campaign.

✓ Highest Reach

Crochet Phone Handbag Reel

The reel achieved the highest overall reach and views, confirming that short-form video remains the most effective content format for attracting new audiences.

✓ Highest Engagement

Crochet Earphone Bag Demonstration Reel

By showing the practical use of the product, this reel generated strong interactions and contributed directly to customer inquiries.

✓ Best Educational Content

Let's Answer Crochet FAQs – Part 2

Educational content consistently encouraged audience interaction and reinforced Yarn Charms' credibility as a knowledgeable crochet brand.

✓ **Best Conversion Content**

Crochet Earphone Bag Launch

This post successfully generated a customer inquiry, demonstrating its effectiveness in encouraging purchase consideration.

8.7 Key Insights

- Several important trends emerged during Project 2:
- Reels consistently achieved greater reach than static image posts.
- Demonstrating how products are used generated stronger engagement than simply displaying them.
- Educational content continued to outperform traditional promotional posts in terms of audience interaction.
- Facebook proved more effective for generating followers and customer inquiries.
- Instagram remained the strongest platform for engagement and content visibility.
- Repurposing content for LinkedIn successfully extended the campaign beyond traditional social media marketing.

These findings support the importance of combining educational content, product demonstrations, and platform-specific strategies to achieve stronger marketing outcomes.

8.8 Data-Driven Recommendations

Based on the campaign analytics, the following recommendations are proposed for future marketing activities:

- Continue prioritizing reels that demonstrate product usage in real-life scenarios.
- Maintain a balanced content strategy combining educational and promotional posts.
- Increase posting frequency on Facebook to capitalize on its audience growth potential.
- Introduce stronger call-to-action phrases to encourage more direct inquiries.
- Expand the use of LinkedIn for sharing professional insights and business milestones.
- Implement live SEM and Meta advertising campaigns to evaluate real conversion performance.
- Continue monitoring analytics regularly to support evidence-based marketing decisions.

9. Campaign Optimization & A/B Testing

9.1 Content Optimization

One of the primary objectives of Project 2 was to optimize the digital marketing campaign based on insights gathered from Project 1 and ongoing campaign analytics. **Rather than increasing the quantity of content, the focus shifted towards improving content quality, audience relevance, and engagement.**

Performance analysis showed that audiences responded more positively to educational posts and product demonstration videos than to traditional promotional content. As a result, the content strategy was adjusted to prioritize value-driven and informative posts while presenting products in practical, real-life scenarios.

Several optimization techniques were implemented throughout the campaign:

- Increased the number of educational posts to answer common crochet-related questions.
- Used storytelling and informative captions instead of purely promotional copy.
- Created reels demonstrating how products could be used in everyday situations.
- Repurposed campaign content for LinkedIn to reach a professional audience.
- Maintained consistent branding across all published content.
- Monitored analytics after each post to evaluate performance and identify trends.

These adjustments contributed to stronger audience engagement and provided valuable insights into user preferences.

9.2 A/B Testing

To explore the effectiveness of different advertising messages, a mock A/B test was conducted as part of the Google Ads campaign planning.

Test Objective

To determine which advertising approach would be more effective in attracting potential customers interested in handmade crochet products.

Element	Version A	Version B
Headline	Handmade Crochet Gifts for Every Occasion	Looking for a Meaningful Handmade Gift?
CTA	Shop Now	Learn More
Focus	Product Variety	Emotional Appeal

Analysis

Version A focused on presenting the range of available crochet products, making it suitable for users with **clear purchase intent**.

Version B used **emotional messaging** by emphasizing thoughtful handmade gifts and personalization. Handmade businesses often rely on emotional connections rather than price competition, making this approach particularly relevant for Yarn Charms.

Expected Outcome

Although no live advertisements were published, **Version B was projected to generate stronger engagement due to its storytelling approach and emotional appeal**. This aligns with broader campaign findings, where informative and value-focused content consistently outperformed direct promotional messaging.

The exercise demonstrated the **importance of testing different communication styles before investing in paid advertising**.

10. Campaign Challenges

Like many real-world marketing campaigns, Project 2 presented several practical challenges that required strategic decision-making and efficient time management.

Limited Project Timeline

The project deadline was moved forward, significantly reducing the time available for content creation, publication, and analytics collection. This required **prioritizing high-impact activities and maintaining a structured workflow**.

Limited Product Availability

As Yarn Charms is a small handmade business, only a limited number of new products were available during the campaign. To overcome this,

existing products were presented through fresh content formats such as educational posts and demonstration reels instead of relying solely on new product launches.

Resource Constraints

The campaign was completed using existing materials and self-created content without professional photography equipment or a dedicated marketing budget. Despite these limitations, consistent branding and engaging visuals were maintained across all platforms.

International Shipping Limitations

One customer inquiry originated from New York, demonstrating international interest in Yarn Charms. However, the purchase could not proceed because shipping costs exceeded the customer's expectations. This highlighted a future opportunity to explore more affordable international shipping solutions.

Time Constraints for Community Activities

Although community-building story concepts and interactive engagement activities were prepared, they were not published during the project due to the shortened timeline. These activities remain valuable recommendations for future campaigns.

11. Key Learnings

Project 2 provided valuable practical experience in campaign optimization, audience analysis, and strategic digital marketing.

Several important lessons emerged throughout the campaign:

- Different platforms serve different marketing purposes. Instagram generated stronger engagement and interactions, while Facebook proved more effective for follower growth and customer inquiries.
- Product demonstration videos consistently performed better than static promotional posts. Audiences responded more positively when they could see how a product could be used in everyday life.
- Educational content remained one of the strongest-performing content categories, reinforcing the value of providing useful information alongside promotional material.
- Analytics should guide marketing decisions. Monitoring performance after each post helped identify successful content formats and informed future content planning.

- Repurposing content across platforms increased efficiency while extending campaign reach to professional audiences through LinkedIn.

Overall, the project reinforced the importance of creating audience-focused content supported by data rather than assumptions.

11. Future Recommendations

Based on the findings of Project 2, the following recommendations are proposed for future campaigns:

- Continue **prioritizing educational content** that addresses common crochet questions and provides value to the audience.
- Increase the **production of reels demonstrating product functionality**, as these consistently achieved higher reach and engagement.
- **Expand Facebook marketing efforts** to capitalize on its strong follower growth and conversion potential.
- Launch live Search Engine Marketing (SEM) and Meta advertising campaigns to evaluate actual advertising performance and return on investment.
- Develop **partnerships with micro-influencers** within the handmade and lifestyle niches to increase brand awareness.
- Introduce regular community-building activities such as polls, Q&A sessions, and interactive stories to strengthen audience relationships.
- **Explore cost-effective international shipping options** to convert overseas inquiries into successful sales.
- Continue using LinkedIn to document professional achievements and share marketing insights, strengthening both personal branding and business credibility.
- Maintain regular performance monitoring to ensure future marketing decisions remain data-driven.

13. Conclusion

Project 2 successfully demonstrated the progression from content creation to strategic campaign optimization. By building upon the foundation established in Project 1, the campaign introduced advanced digital marketing concepts including Search Engine Marketing (SEM), influencer outreach planning, mock paid advertising, email marketing, LinkedIn content repurposing, and analytics-driven decision-making.

The campaign confirmed that **content providing educational value and practical product demonstrations resonates more effectively with audiences than purely promotional material**. Analytics further revealed distinct platform behaviors, with Instagram excelling in engagement, Facebook driving audience growth and customer inquiries, and LinkedIn strengthening professional visibility.

Despite limitations such as a shortened project timeline, limited product availability, and the absence of a live advertising budget, the campaign **achieved meaningful outcomes and generated actionable insights for future marketing efforts**.

Most importantly, Project 2 emphasized that successful digital marketing is not simply about publishing content - it is about **understanding audience behavior, adapting strategies based on evidence, and continuously optimizing campaigns to achieve better results**. These experiences have strengthened both my practical marketing skills and my confidence in planning and managing integrated digital marketing campaigns for a real business.

Appendix A – Digital Marketing Tools & Platforms Used

The following tools and platforms were utilized throughout Project 2 for content creation, campaign planning, analytics, documentation, and reporting.

Tool / Platform	Purpose
Canva	Designed social media posts, carousels, story concepts, ad creatives, and presentation visuals.
Instagram	Published campaign content, monitored audience engagement, and collected performance analytic.
Facebook	Published content, monitored page growth, generated customer inquiries, and analyzed campaign performance.
LinkedIn	Published a professional post and article to repurpose campaign content and expand professional reach.
Meta Business Suite	Scheduled content (where applicable) and reviewed Instagram and Facebook performance insights.
Ubersuggest	Conducted keyword research for the Search Engine Marketing (SEM) strategy.

Keyword Tool	Identified additional search keywords and long-tail keyword opportunities.
Google Ads (Mock Campaign)	Planned Search Engine Marketing (SEM) campaigns and created search ad variations.
Mailchimp (Mock Campaign)	Designed a three-email drip campaign for customer engagement and retention.
GitHub	Maintained project documentation, organized weekly deliverables, and tracked project progress.
Google Drive	Stored project files, documentation, creative assets, reports, and supporting materials.
WPS Office	Prepared documentation, maintained the analytics tracker, and compiled the final performance report.

Appendix B – Campaign Deliverables

The following deliverables were completed as part of Project 2:

Content Marketing

- 5 Instagram/Facebook posts
- 3 Instagram/Facebook reels
- 3 Community story designs (planned)
- 1 LinkedIn professional post
- 1 LinkedIn article

Paid Marketing (Mock)

- Search Engine Marketing (SEM) strategy
- Google Ads campaign (2 ad variations)
- Meta Ads campaign setup
- Retargeting campaign

Influencer Marketing

- Influencer outreach strategy
- List of 5 potential influencers
- Outreach message drafts
- Collaboration ideas

Email Marketing

- Three-email drip campaign
- Mock Mailchimp campaign

Analytics & Reporting

- Analytics tracker
- Platform performance analysis
- A/B testing documentation
- Content optimization recommendations
- Campaign performance report
